HARSH GOHEL

SUPPLY CHAIN ANALYST

Rouen France | +33 782363197 | harshgohel647@gmail.com | Linkedin | github | Portfolio

SUMMARY

Motivated professional with experience in sales recruitment, client relationship management, LinkedIn profile management, and Excel-based data handling. Completed a Data Science Internship at Jainwell Services Pvt. Ltd., developing skills in Python, Pandas, NumPy, Matplotlib, SQL, and Excel. Eager to apply my analytical, technical, and communication skills to support business growth.

WORK EXPERIENCE

Bench Sales Recruiter | StarGaze Recruitments **Dec 2025 - Jul 2026**

- Optimized client LinkedIn profiles to increase visibility and support recruitment and sales outreach.
- Identified potential clients and managed recruitment-related information, keeping communication professional and timely.
- Maintained client and candidate databases in Excel, verifying data entry for accurate, consistent records and reports.
- Built client relationships through effective communication and timely follow-ups.
- Worked with team members to manage client requirements and keep records updated across the recruitment process.

Data Science Intern | Jainwell Services Pvt. Ltd. **Nov 2024 - Nov 2025**

- Analyzed and visualized data in Python (Pandas, NumPy, Matplotlib); wrote SQL queries to retrieve, filter, and manage structured data.
- Used Microsoft Excel for data organization, cleaning, and basic analysis.
- Applied data preprocessing, data manipulation, and exploratory data analysis (EDA) through practical data science exercises, building analytical and problem-solving skills.

PROJECTS

Sales Forecasting Using Time Series | Python, ARIMA

- Built a time series model in Python to forecast monthly sales for a retail chain dataset, using EDA to identify trend, seasonality, and cyclic patterns.
- Achieved an 18% MAPE improvement over naive forecasts, giving reliable forward-looking indicators for inventory and budgeting decisions.

Student Performance Analysis | Python, Pandas, Matplotlib, Seaborn

- Analyzed student exam score data to find academic performance patterns and trends, handling missing values and cleaning the CSV data.
- Created histograms and distribution plots that communicated findings clearly and surfaced actionable insights on factors influencing performance.

EDUCATION

NEOMA Business School, Rouen, France **Sep 2026 - Present**

Master of Science in AI for Business

SAL Engineering & Technical Institute, India **Oct 2021 - Apr 2025**

Bachelor of Engineering, Information & Communication Technology

SKILLS

- Programming: Python
- Python Libraries: Pandas, NumPy, Matplotlib, Seaborn
- Database Management: SQL
- Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- Microsoft Office: Excel, Word, PowerPoint
- Data Visualization: Matplotlib, Seaborn

SOFT SKILLS

- Client Relationship Management
- Communication Skills
- Time Management
- LinkedIn Profile Management
- Attention to Detail
- Data Management and Organization
- Problem-Solving

CERTIFICATES

- Introduction to Generative AI (Google Cloud)
- PowerBI For Beginners (Microsoft)
- Excel Dashboard for Beginners (Microsoft)
- PowerBI Data Modelling (Microsoft)

LANGUAGES

- English - B2
- French - A2
